IN THE SPECIFICATION

On page 2, line 12, please replace "Figure 5" with --Figure 1--.

IN THE CLAIMS

Please cancel claims 1-11, 20-25, and 30 without prejudice. Please add the following new claims 31-37.

1 31. (New) A memory device, comprising:

a memory array;

a register configured to store at least one bit indicating a suspend status of

4 a write operation; and

5 a control circuit coupled to said memory array and said register, said

6 control circuit is donfigured to update said register and to control the output of a

status signal representing said protection status of said data modification

operation, and wherein said control circuit includes:

9 a first state machine configured to update at least one of said bits

indicating said suspend status of said write operation in response to a

11 suspen¢ signal, and

12 a second state machine coupled to said first state machine and

configured to control the output of said status signal in response to a

14 status request signal.

32. (New) The memory device of daim 31, wherein said write operation represents a byte write operation.
